

## Naming Conventions

Station names should be NameNumber\_CitySite\_ST. This SHOULD work for all current restaurants, both Darden and non-Darden. As an example, the one I worked with Ryan on this morning I renamed to FPS2002\_Naples\_FL. If the city also needs additional information to help identify it then it should be joined to the city name with no space, underscore, or other special character. For example: FPS5403\_HoustonRiverOaks\_TX.

Email addresses should be the same with \_Device at the end and also going to @NomadGroup.com. Examples :FPS2002\_Naples\_FL\_Jene and FPS2002\_Naples\_FL\_PDR1. Device names are short variations such as \_MD. The 'polite name' should be exactly the same. What this means is that when you receive emails that look something like this: FPS2002\_Naples\_FL\_Jene <FPS2002\_Naples\_FL\_Jene@NomadGroup.com>.

We are using abbreviations for the restaurant names. The Darden ones you are probably familiar with, such as BB for Bahama Breeze. The couple that may not be as obvious are the Seasons 52 is just S and The Capital Grille is CG. Here are the non-Darden abbreviations we should be using:

RL – Red Lobster  
FPS – Fleming's Prime Steakhouse  
RCSH – Ruth's Chris Steak House  
HRC – Hard Rock Café  
EKB – Earls Kitchen & Bar

Device names would be:

\_JENE  
\_CPI  
\_HS  
\_BAR  
\_MD  
\_PDR1  
\_PDR2
