

Haiku H and I Series 0–10 V Module

TECHNICAL SPECIFICATIONS

The Haiku H and I Series 0–10 V driver offers the convenience of integrating Haiku H and I Series fans with a home or building automation system or virtually any 3rd party 0–10 V dimmer using an industry-standard protocol. Tucked away neatly in the escutcheon, the 0–10 V driver provides independent control of fan speeds and light intensity while supporting daisy-chaining for one or up to 10 fans — sorry, constraints for number of fans are determined by the specific OEM controller.

The driver offers ultimate flexibility of control for Haiku H and I Series by providing a voltage between 0 and 10 VDC to produce varying fan speeds and lighting levels — 10 V as 100% on and 0–1 V as off.

FEATURES

- Fan control: speed up/down and on/off
- Light control: intensity up/down and on/off
- No programming involved
- 0–10 V driver “sinks or sources” voltage — Standard ANSI E1.3
- Compatible with any 0–10 V “sinking/sourcing” dimmer (Lutron Diva — DVTV-WH available upon request)
- Compatible with most home or building automation systems
- Compatible with Universal Mount Haiku H and I Series fans

Technical Specifications	
Model number	007343
Fan speed/Light intensity	100–0%, linear
Installation	Screw terminals from fan to driver Universal Mount H and I Series fans only
Certifications	Intertek/ETL-certified to UL 507 and CSA C22.2
